7 Stages

Purification Filters

1. Pre-filter

2. Cold Catalyst filter

3. Effective Formaldehyde filter

4. Sterilizing filter

5. HEPA filter

6. Ultraviolet sterilization

7. Anion release

ION STATION

Multistage air filtration

www.aqualifeusa.com

Up to 600 Sq.ft | Japanese technology and assembly in USA.

Why use an air purifier?

Because the air is getting worse

i For those who suffer from allergies & asthma and anyone that wants the ultimate protection.

01

Automobile exhaust emission

02

New house decoration pollution

03

Industrial waste gas pollution

04

There are smokers at home

05

Family pet odors

06

Floating dust

07

Pollen allergens

08

Acarid in the quilt

Don't let yourself and your family be a filter

Indoor air pollution is 2 to 5 times of outdoor air pollution, sometimes even 100 times!

www.aqualifeusa.com
