

# Water.io The Smart Water Bottle

## Water.io User Guide

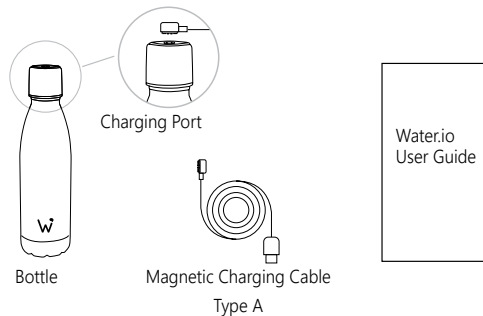

Congratulations for purchasing the Water.io Smart Water Bottle! We are excited to embark on this new journey with you to a more hydrated body and healthier lifestyle.

Most of us don't realize how important it is to drink enough water. Water speeds up your metabolism, gets toxins out of your body, improves your brain activity, polishes your skin and much more! Considering that 60-70% of your body is water, it only makes sense, right?

As an added benefit, reusable water bottles contribute to the environment. In fact, using a reusable water bottle can save 150 single-use plastic bottles a year.

Let's toast to a healthier, eco-friendly future full of fresh water!

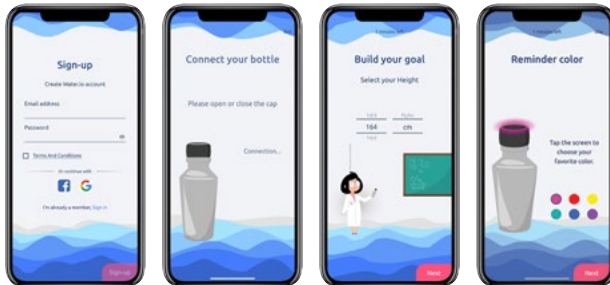

### Unboxing

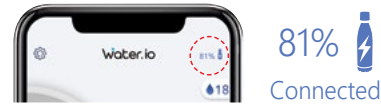

# Setting up

## Download the app, connect your smart bottle and discover your daily goal

- Search “Water.io” app in the App Store or Google Play or scan the QR code.
- Follow the on-screen instructions through the registration process and connect your smart bottle with the app.
- Insert the details our smart algorithm needs in order to create a personalized daily goal tailored for your needs.

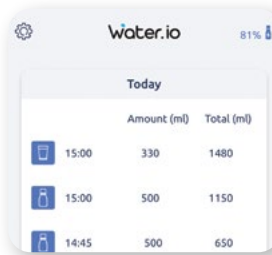

- Once the initial connection with the app is done, You can always see if you are connected or not.
- **Blue bottle** - bottle and app are connected and data is synced.
- **Gray Bottle** - The bottle is not nearby and not connected at the moment.

# Ready set drink

## Great, now you can start using Water.io.

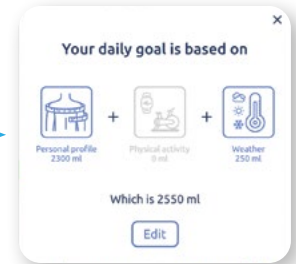

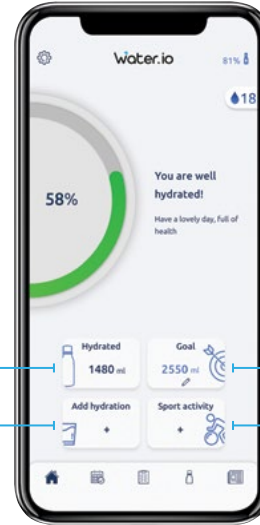

The app home page displays your daily goal, how much you drank and your progress.

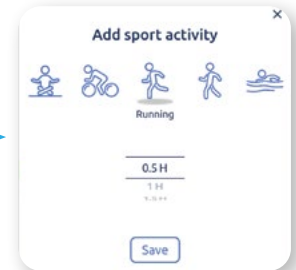

Every single sip you will take from the bottle will be recorded in the app. If you want to erase hydrations, press on a specific **event** and then tap the red bin that appears on the right.

**You can manually add water** that was not consumed through the bottle with the **"add hydration"** button.

**Tapping the "Goal" button,** will lead you to a pop up that explains what your daily goal calculation is based on. Here, you can edit your daily goal if you feel that it is necessary for you.

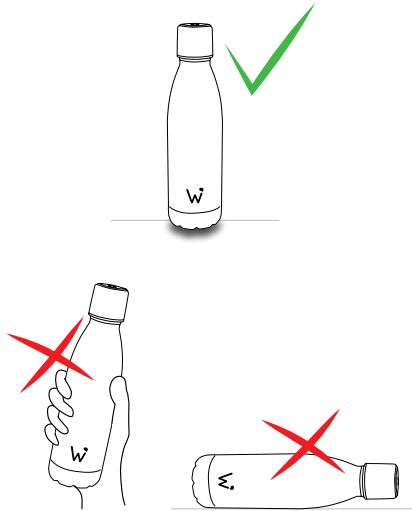

**Did you do sports today?** First of all, good for you! Secondly we got your back, add the activity and we will adjust your daily goal.

# The bottle

## Measurements

- Everything you drink through the bottle is measured and documented.
- The bottle performs measurements after every time that you open and close the cap and place it on a stable surface. Once a measurement is performed, the cap LED lights will blink once as an indication.

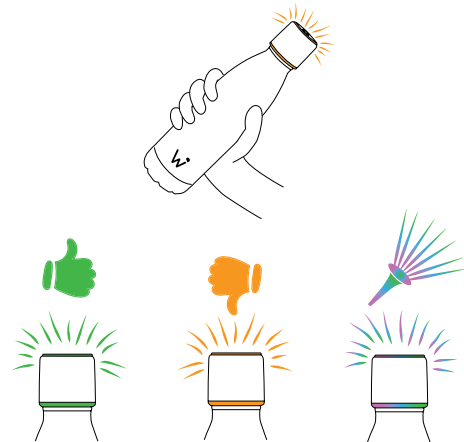

## Hydration status

Tilt your bottle to check your status.

If the **light turns green**, you are on the right track!

**Orange** means you're behind your goal and need to drink more water.

Only when you reach your daily goal will the **rainbow lights** start celebrating.

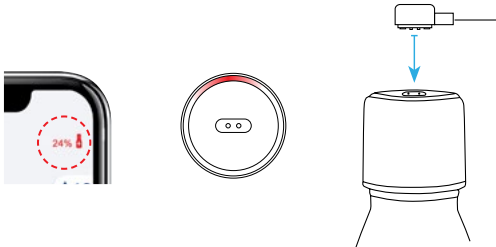

When you are behind your daily goal the bottle will periodically remind you to drink water by blinking lights in the color of your choice and a vibration.

# Things you should know

## Charging

- When the battery is low the cap will blink in weak red light as illustrated below and you will receive a notification to your smartphone.
- Use the charging cable that is provided to charge your smart bottle. Plug the USB cable to a power supplier and to the cap, the cap will light up when it starts charging.
- It takes up to 1 hour to fully charge the smart bottle. Battery life is about 3-7 days of use, depending on how much you use the different features. You can always follow the battery level through the mobile app.

## Cleaning and operation

- The best way to clean your bottle is with a cleaning brush and some soap and water. **Do not wash you smart bottle in the dishwasher**
- **Do not leave the bottle in extreme temperature conditions for long periods of time. (Such as your car)**

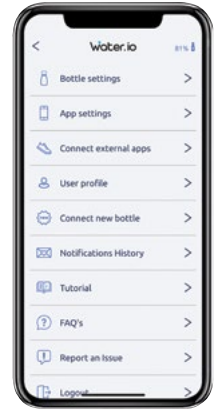

## Tips for professionals

- You can add an indication so that every time the cap is opened and closed, the LED lights will light up gradually in the right direction. This way you can be sure that the bottle was opened, closed, and is now measuring.
- If the vibration bothers you, you can turn it off through the settings menu (under bottle settings).
- To make sure that the bottle doesn't wake you up during hours in which you are not active, you can edit the activity hours through the settings menu (under bottle settings)
- If you feel a need for some extra encouragement, enable the app notifications.
- The app notifications are time-based and are not in sync with the bottle reminders that work according to your hydration progress. Who cares? The important thing is that you drink more water!

Follow our website at **Water.io** and our facebook page for more information, FAQ's, videos, and tips.

If you need special assistance please contact our support team at Support@water.io or through our website.

Thank you again for purchasing the smart Water.io bottle and thank you for contributing to planet earth. Take a sip of fresh water, you deserve it.

## FCC compliance

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications to this product not authorized by ImpacX could void the electromagnetic compatibility (EMC) and wireless compliance and negate your authority to operate the product. This product has demonstrated EMC compliance under conditions that included the use of compliant peripheral devices and shielded cables between system components. It is important that you use compliant peripheral devices and shielded cables between system components to reduce the possibility of causing interference to radios, televisions, and other electronic devices. This product was tested for EMC compliance under conditions that included the use of ImpacX peripheral devices. Responsible party (contact for FCC matters only): ImpacX, 2 Bergman St. (Entrance A), 2nd floor. Rehovot, Park Hamada 7670503, Israel.

## Limitation of Liability

The company and/or anyone on its behalf are not responsible to you and/or to others for any damage whatsoever, including indirect damage, mental anguish or discomfort, or for any harm related to or arising from the use of the product, website, content, and services (including in connection with their supply) or reliance thereon on them or the inability to use them or from any action the company took or refrained from, even if the company or its messengers or representatives knew or were informed of the possibility of a damage event of this kind, to you or anyone other than you. Without derogating from the previous, the company's liability towards you for any reason will not exceed the amount paid by you to the company, if any, for and/or in connection with the product.
